

BRAND STYLE GUIDE

Pycsure

All the joy of a disposable film camera — none of the waste, none of the screen fatigue. One tap, a roll of nostalgic looks, and a laugh in your pocket.

01 — NICHE & AUDIENCE

What we make & who it's for

The niche. Pycsure is a mobile retro-camera experience. One shutter tap produces a full "roll" of **12 film-style photo variants** (4 filters × 3 flash looks) plus a **4-second video** — finished off with meme shutter sounds and funny pose prompts. It turns a single moment into a playful, share-ready set of analog-flavored shots.

The feeling we sell. Nostalgia without the hassle: the warmth of film and the fun of a disposable cam, reborn as a tap-and-go app.

Who we create for:

- Gen Z & younger millennials chasing the film / analog aesthetic
- Social sharers posting candid, "unserious" content
- Travelers, festival-goers, campers & party crews
- The "digital-detox / dumbphone" crowd who still want fun
- Meme-literate casual creators, not pro photographers

Warm coffee & cream

The whole system is a vintage, sun-faded coffee palette — cream paper highlights deepening into espresso shadows. Light, cozy, and analog.

Clean system sans + retro mono

PRIMARY • HEADLINES & UI

SF Pro / Roboto — Aa Bb Cc 123

Native system sans-serif (SF Pro on iOS, Roboto on Android). Weights 600–700 for titles and actions; 400 for body. Keeps the UI fast, legible, and effortlessly modern.

ACCENT • TECHNICAL & RETRO LABELS

VTG1 • BW • 4K • 00:04 • /pycsure

Monospace for filter codes, counters, timers, and any "camera readout" moment — it sells the analog-device feel and adds character.

Warm, nostalgic & playfully analog

Cozy and vintage on the surface, fun and a little unserious underneath. Think faded film prints, a satisfying shutter click, and a meme sound that makes everyone laugh. Lo-fi by design, never sterile.

Tactile

Effortless

Brands & looks we admire

- **Camp Snap** — screen-free retro digicam; warm, low-fi, soft-focus "disposable film" look and friendly, nostalgic branding.
 - **Dispo** — the disposable-camera app energy: candid, no-preview, share-the-roll fun.
 - **Huji Cam** — date-stamped, light-leaked '90s film filter aesthetic.
 - **Lomography / Kodak Gold** — golden-hour warmth, grain, and saturated nostalgia as a north star.
-

06 — DO & DON'T

Do

- Lean into warm, faded film tones
- Keep copy light, witty, human
- Use grain, light leaks & soft focus
- Show candid, real moments
- Pair clean sans UI with mono accents

Don't

- Use cold blues, neon, or pure black/white UI
 - Sound corporate or overly technical
 - Over-sharpen or over-polish imagery
 - Pose stiff, staged, "stock-photo" shots
 - Clutter the interface — keep it one-tap
-

Paste this into future AI prompts

BRAND: Pycsure — a retro/disposable-style mobile camera app.

AUDIENCE: Gen Z & young millennials who love the film/analog aesthetic; social sharers, travelers, festival & camp crowds; meme-literate casual creators.

VIBE: warm, nostalgic, cozy-analog, playful, meme-friendly, lo-fi film grain — never cold, corporate, or over-polished.

COLORS: cream #F5E6CC, sand #E0C097, tan #D4A373, caramel #A47148 (primary), coffee #6F4E37, espresso #4E342E (text). Surface #FFF8EE.

FONTS: clean system sans (SF Pro / Roboto) for headlines & UI; monospace for technical/retro labels (filter codes, timers).

REFERENCES: Camp Snap, Dispo, Huji Cam, Lomography / Kodak Gold film looks.

RULES: golden-hour warmth, grain & light leaks; candid not staged; witty human copy; one-tap simplicity.
